

Webmasters Report for the AGM Meeting August 2013

Last year there was some talk about changing web servers so I have looked into cheaper web hosting although we could get some cheaper space we have a unique site as there are so many webmasters working on it and there are no sites that I can find that allow that to the extent that We have easily. Also a major problem on a cheaper system could be devastating. At least with our current system we have technical people that we can work with. Although I am not 100 % happy with our current host I would like to find some other host but It is difficult. I have re arranged the meeting minutes to make it easier to sort through. I have set up a new area in Region 3 called OSRRDA News as part of his promotions.

On our index page we have a link that is not being maintained it is our **CLUB ANNIVERSARIES** link.

The last entries were for 2010 2011.

I would like to thank all the members that have contributed to the website for all their help.

Webmaster

Phil Douziech
