

Webmasters Report for the AGM Meeting August 2014

This last year has been an interesting one to say the least.

It must have something to do with the moon but many of my webmasters resigned and had to be replaced this was a first time I had so much change.

I while working on the website hit the wrong key and WHALA no website any more.

So As part of the service that our provider provide is that they back up our website on a regular basis so I had to contact them & have everything reset luckily it was only down for a very short time. I then contacted all webmasters to make sure that everything was up to date and their passwords etc. were ok. I have also discontinued a couple links one to a picture gallery and the other to Out of area dance.
