

Moving & Grooving Report - BOD
March 2014

Submitted by Mary Anne and Nick Turner

We continue to make Moving and Grooving available and handle its distribution. We are also managing the Moving and Grooving website. It is located at <http://movingandgrooving.squaredance.bc.ca> and we encourage you to link your websites to the Moving and Grooving site, if appropriate.

We are pleased to report that Moving and Grooving is a resource listed on the Healthy Schools BC website. Healthy Schools BC brings together healthy schools information, products, programs and resources from across BC into one convenient and easy to use website, and demonstrates how these programs can work together in a planned, coordinated way under the Comprehensive School Health approach. Many of the resources available on this website are designed for education and health professionals, however can also be accessed by parents and other interested groups.

Those seeking dance-related resources can simply go to the website at www.healthyschoolsbc.ca Clicking on the **Programs and Supports** link and typing **dancing** in the search box will bring Moving and Grooving information up on the top of the list.

Again we encourage all dancers and leaders to become familiar with the Moving and Grooving program and to speak to your local schools and community groups about it. Refer them to the Moving and Grooving website for more information and to hear sound clips. Help us to involve children and others in a positive dance experience.
