

## Webmaster's Report to the BOD on April 2, 2016

The re-design of the web site is finished and I now have administrative log-in.

In mid-February I did a 3 hour on line session (no charge) with Rae from Aponis to get a basic understanding of Joomla, the program we now use for the web site. I spent a week and a half discovering how to make changes and edits to various parts of the site.

The process of adding missing content, fixing links and checking spelling is taking a while. As of April 2, 2016 you should all see a completed web site. The logo that was altered by the designer of the new site will have been replaced by the correct original logo.

The new program for the site is doing a good job of blocking hackers, Joomla records any attempted access to the administrator part of the site and I am able to blacklist (block access) to these unwelcome visitors.

Regards,

Frank McNeil

Webmaster for the BCfed
